

**Description:** This document provides tables of operating systems and other programs that are compatible with ICONICS products. Requirements for unreleased products are subject to change before release.

Items labeled “Not Tested” are combinations that ICONICS does not explicitly test for or support, but for which there are no known issues. Items labeled “Not Supported” have known issues. ICONICS does not guarantee compatibility for either of these categories. Issues found in a “Not Tested” or “Not Supported” scenario may not be solvable by ICONICS Technical Support without migrating to a supported scenario.

Items labeled “Not Released” are the expected requirements/compatibilities and are subject to change before the final release.

This document is updated on a regular basis. For the most up-to-date copy, visit the Customer Connection Portal at: <https://getconnected.iconics.com>.

\* **Notes for XP:** Any supported products will run only on Professional Edition. "64-bit" in the Window XP column refers to "Windows XP x64 Edition", not "Windows XP 64-bit Edition".

\* **Note for all 64-bit operating systems:** All supported 32-bit products will run in 32-bit compatibility mode on 64-bit operating systems.

\* **Note for Embedded operating systems:** ICONICS cannot guarantee compatibility with "Embedded" class operating systems.

"Embedded" operating systems are often customized for their particular device, and if any operating system components were removed that our product relies on then those features will not function properly. There is an application note entitled, "Embedded GENESIS32 – Configuring Embedded Operating Systems" that can help you ensure compatibility.

\* **General Note:** The Data Mining OPC server can query a larger variety of databases than what is listed in this matrix. This matrix is designed to show the databases that can be used as configuration databases for many of our configurators and as logging databases for TrendWorX32 Logger and AlarmWorX32 Logger, since they are more limited in the databases that can be used. "Not Supported" in this matrix does not necessarily mean that the Data Mining OPC server will be unable to query the database.

\* **Note for Oracle:** Oracle is only supported for TrendWorX32 and AlarmWorX32 Logging Databases only. We do not allow any version of Oracle to be used as a configuration database. The Oracle Data Connector is required in all versions.

\* **Data Connector Note:** A Data Connection license is required to log to this type of database in this version of GENESIS32. Without this Data Connection license the logger will only log for two hours.

\* **Note for ReportWorX 9.01 and Excel XP/2000:** If you are using Excel 2000 or Excel XP, there may be an issue with closing your template, where Excel would be left hanging in memory, thereby causing the ReportWorX Configurator to stay hidden in the background. You should manually kill Excel.exe in the processes list to cause the ReportWorX Configurator to come back to the front.

## ICONICS Compatibility on One Machine

This table describes which versions of ICONICS products can be installed on the same machine because they share a common licensing version. Items on the same row can be installed on the same machine. Items on different rows require different licensing versions so they cannot be installed on the same machine.

<b>GENESIS64, AnalytiX, &amp; Hyper Historian</b>	<b>GENESIS32 &amp; BizViz</b>	<b>ICONICS OPC Server Suite by Kepware</b>
10.96	9.60	5.5c*
10.95	9.50	5.5c
10.90-10.93	9.40	5.5b
10.80-10.87	9.30-9.35	5.5a
10.7x	9.22 (with 9.27 Licensing SP*)	5.5 (with 9.27 Licensing SP*)
10.6x	9.22	5.5
10.5x	9.20-9.21	5.3
10.0x	9.0x-9.1x	4.3

\* **General Note:** Certain products cannot have both their 32- and 64-bit components installed on the same machine at the same time. These products include: AlarmWorX32 Multimedia/AlarmWorX64 Multimedia, BridgeWorX/BridgeWorX64, and ReportWorX/ReportWorX64.

\* **10.96 & 5.5c Note:** When 10.96 and 5.5c products are installed on the same system, the 64-bit version of the License Utility must be used to activate all ICONICS license, including 5.5c.

\* **9.27 Note:** Version 10.7x is only compatible with version 9.22 GENESIS32, 9.22 BizViz, or 5.5 ICONICS OPC Server Suite if the 9.27 Licensing Service Pack is applied. This licensing service pack will be installed automatically by default with 10.7x.
