

DNR Series

- Up to 90% Efficiency
- Wide Adjustment Range
- Parallel Function
- DC Standby Versions
- Full Power from $-40\text{ }^{\circ}\text{C}$ to $+60\text{ }^{\circ}\text{C}$
- 3 Year Warranty

Derating Curves

DNR120 (A) - 240 (B)

DNR480PS

DC OK

Volt free contact closed when voltage at unit output is within specification. In standby system configured as shown this voltage may be provided by the PSU or battery.

Open = Output fail
Closed = Output good

Contact Rating: 0.3 A at 60 VDC
500 VDC isolation

Standby Versions

Maximum current drain from battery by PSU when inactive 22 mA.

Notes

1. Suffix # indicates DC standby version.
2. With AC in, unit provides power to the load and to charge the battery. The DC OK signal acts by sensing a voltage on +V and holds the relay closed.
3. With loss of AC in, battery voltage is present on +V. DC OK signal holds the relay closed. Battery supplies power to the load.
4. As the battery discharges, its voltage falls. When this falls below the level shown in the table the DC OK signal switches off to allow the relay to open to disconnect and protect the battery.
5. Available for OEM quantities, contact sales.
